

INDEX OF VOLUME XVI

- Bressler, D. W. and Sion, M. *The current theory of analytic sets*, 207
- Brown, W. G. and Tutte, W. T. *On the enumeration of rooted non-separable planar maps*, 572
- Cantor, David G. *Determining a set from the cardinalities of its intersections with other sets*, 94
- Cargo, G. T. *Almost-bounded holomorphic functions with prescribed ambiguous points*, 231
- Ceder, Jack. *On outwardly simply line families*, 1
- Cheney, E. W. and Sharma, A. *Bernstein power series*, 241
- Cohen, Henry B. *The k -extremally disconnected spaces as projectives*, 253
- Cowling, V. F. and Miracle, C. L. *Corrections to and remarks on some results for the generalized Lototsky transform*, 423
- Craig, Robert T. *Extension of finite projective planes. I. Uniform Hjelmslev planes*, 261
- Dean, R. A. *Free lattices generated by partially ordered sets and preserving bounds*, 136
- Dixon, John D. *Complete reducibility of infinite groups*, 267
- Edwards, R. E. *Convolutions as bilinear and linear operators*, 275
- Forelli, Frank. *The isometries of H^p* , 721
- Foulser, David A. *The flag-transitive collineation groups of the finite Desarguesian affine planes*, 443
- Fox, Charles. *The solution of an integral equation*, 578
- Fulkerson, D. R. *The maximum number of disjoint permutations contained in a matrix of zeros and ones*, 729
- Gale, David. *On the number of faces of a convex polytope*, 12
- Gilbert, E. N. *Randomly packed and solidly packed spheres*, 286
- Gilbert, Richard C. and Kramer, Vernon A. *Trace formulas for powers of a Sturm-Liouville operator*, 412
- Gilmore, P. C. and Hoffman, A. J. *A characterization of comparability graphs and of interval graphs*, 539
- Ginzburg, A. *A note on Cayley loops*, 77
- Gordon, B. and Rogers, K. *Sums of the divisor function*, 151
- Gottlieb, Daniel H. *Homotopy and isotopy properties of topological spaces*, 561
- Hanani, Haim. *On covering of balanced incomplete block designs*, 615
- Heath, R. W. *Screenability, pointwise paracompactness, and metrization of Moore spaces*, 763
- Herstein, I. N. and Small, Lance. *Nil rings satisfying certain chain conditions*, 771
- Hill, J. D. and Sledd, W. T. *Summability-(Z, p) and sequences of periodic type*, 741
- Hirschman, I. I., Jr. *Variation-diminishing transformations and general orthogonal polynomials*, 98
- Hoffman, A. J. *See Gilmore and Hoffman*
- Isaacs, I. M. and Passman, D. S. *Groups with representations of bounded degree*, 299
- James, Robert C. *Weak compactness and separation*, 204
- Johnsen, E. C. *The inverse multiplier for abelian group difference sets*, 787
- Jordan, J. H. *Pairs of consecutive power residues or non-residues*, 310
- Keller, Roy F. *Motions of matrix rings*, 159
- Khan, Nisar A. *Linear relations between higher matrix commutators*, 315
- Killgrove, R. B. *Completions of quadrangles in projective planes*, 63
- Klee, Victor. *A combinatorial analogue of Poincaré's duality theorem*, 517
- *Diameters of polyhedral graphs*, 602
- *On the number of vertices of a convex polytope*, 701
- Kohler, Joseph. *Finite groups with all maximal subgroups of prime or prime square index*, 435
- Kostant, B. and Novikoff, A. *A homomorphism in exterior algebra*, 166
- Kramer, Vernon A. *See Gilbert and Kramer*
- Laha, R. G. *On the decomposition of a class of functions of bounded variation*, 479
- Lane, N. D. *Arcs of parabolic order four*, 321
- Lane, N. D. and Singh, K. D. *Conical differentiation*, 169
- Leech, John. *Some sphere packings in higher space*, 657

- Mallory, Donald J. and Sion, Maurice. *On covering systems*, 18
- Marcus, Marvin and Yaqub, Adil. *Compounds of skew-symmetric matrices*, 473
- Meir, Amram. *On two problems concerning the generalized Lototsky transforms*, 339
- Mendelsohn, N. S. *An algorithmic solution for a word problem in group theory*, 509
- Mesner, Dale M. *Traces of a class of $(0, 1)$ -matrices*, 82
- Miracle, C. L. *See* Cowling and Miracle
- Moon, J. W. *Tournaments with a given automorphism group*, 485
- Mott, Joe Leonard. *Equivalent conditions for a ring to be a multiplication ring*, 429
- Muskat, Joseph B. *Criteria for solvability of certain congruences*, 343
- Novikoff, A. *See* Kostant and Novikoff
- Olubummo, A. *Complemented Banach algebras*, 149
- Passman, D. S. *See* Isaacs and Passman
- Pierce, William A. *Collineations of affine Moulton planes*, 46
- *Collineations of projective Moulton planes*, 637
- Puttaswamaiah, B. M. and Robinson, G. de B. *Induced representations and alternating groups*, 587
- Quintas, Louis V. *One-dimensional cell complexes with homotopy group equal to zero*, 353
- Raney, George N. *A formal solution of $\sum_{i=1}^n A_i e^{p_i x} = X$* , 755
- Ree, Rimhak. *Construction of certain semi-simple groups*, 490
- *Sur une famille de groupes de permutations doublement transitifs*, 797
- Roberts, J. B. *Relations between the digits of numbers and equal sums of like powers*, 626
- Robinson, G. de B. *Modular representations of S_n* , 191
- *See also* Puttaswamaiah and Robinson
- Rogers, K. *See* Gordon and Rogers
- Rooney, P. G. *A generalization of the Hardy spaces*, 358
- Sabidussi, Gert. *Infinite Euler graphs*, 821
- Sagle, Arthur A. *On anti-commutative algebras with an invariant form*, 370
- Sandler, Reuben. *On subplanes of free planes*, 379
- Schwerdtfeger, Hans. *Projective geometry in the one-dimensional affine group*, 683
- Sharma, A. *See* Cheney and Sharma
- Shrikhande, S. S. *Generalized Hadamard matrices and orthogonal arrays of strength two*, 736
- Singh, K. D. *See* Lane and Singh
- Sion, Maurice. *See* Mallory and Sion and Bressler and Sion
- Sledd, W. T. *See* Hill and Sledd
- Small, Lance. *See* Herstein and Small
- Stevens, Harlan. *Linear homogeneous equations over finite rings*, 532
- Traylor, D. R. *Concerning metrizable of pointwise paracompact Moore spaces*, 407
- Turyn, Richard J. *The multiplier theorem for difference sets*, 386
- Tutte, W. T. *From matrices to graphs*, 108
- *See also* Brown and Tutte
- Vanstone, J. R. *Connections satisfying a generalized Ricci lemma*, 549
- White, G. K. *Lattice tetrahedra*, 389
- Wigner, Eugene P. and Yanase, Mutsuo M. *On the positive semidefinite nature of a certain matrix expression*, 397
- Wright, E. M. *Counting coloured graphs II*, 128
- Yanase, Mutsuo M. *See* Wigner and Yanase
- Yaqub, Adil. *See* Marcus and Yaqub
- Yood, Bertram. *Ideals in topological rings*, 28
- Zirakzadeh, A. *A property of a triangle inscribed in a convex curve*, 777
